Office Action Summary	Application No. 10/820,661	Applicant(s) MARTIN, PAUL A.	
	Examiner Paul Kim	Art Unit 2161	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office action is responsive to the following communication: Original application filed on 7 April 2004.
2. Claims 1-42 are pending and present for examination. Claims 1, 15, and 29 are independent.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. **Claims 1-42** are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Claims 1, 15 and 29 recite the limitation of modifying "a next pointer of the existing node to point to the new node" and marking "the next pointer to indicate that the existing node is deleted, whereby the new node becomes part of the linked list and the existing node is deleted in a single atomic operation." However, the aforementioned limitation, as best understood, is inoperative since the deletion of the existing node would bring about the deletion of the existing node's next pointer. Thereby, the existing node would no longer exist nor would the new node be connected to the linked list, furthering the destruction of the linked list itself. Furthermore, the claims fail to recite the essential step of having the next pointer of the new node point to another node within the linked list such that the new node is fully integrated into the linked list. For the aforementioned reasons above, the disclosed invention is inoperative and therefore lacks utility. Therefore, since the claimed invention is inoperative and lacks utility, the Examiner is unable to distinguish the scope of the claimed invention such that no art will be applied in the current examination.
